Objective

Dedicated System Associate with a strong foundation in Application Development and Management, specializing in Full Stack Development.
Proven ability to excel in both independent projects and collaborative team environments.
Enthusiastic, hardworking individual with an unwavering commitment to learning. My extreme passion for problem-solving drives me to excel in the dynamic world of technology.

Experience

May 2022 - Present

Senior System Associate • Infosys

- Contributed to Full Stack Development projects using HTML, CSS, Bootstrap, JavaScript, TypeScript, Java, and React to build responsive and user-friendly web applications.
- Developed software solutions with SpringBoot, Angular, React and Microservices, ensuring smooth front-end and back-end integration.
- Designed and implemented RESTful APIs to improve data exchange and system performance.
- Worked with databases like MySQL and PostgreSQL to manage and optimize data handling.
- Gained hands-on experience in AI tools and techniques, including Generative AI (GenAI), to enhance application features, automate content generation, and improve overall functionality.
- Improved skills in software development by completing internal training courses and earning certifications.

April 2010 – May 2022

Business Owner • Self Employed

- Responsible for supplying various goods to customers on multiple channels and selling platforms, mainly Video Games Software and Hardware
- Setting up and administering accounts on various online selling platforms
- Inventory management
- Thorough and high quality check on items

Education

January 2012 – April 2022

Software Development Skills Bootcamp

Software Development Certificate of Achievement

12 weeks of Software Development Skills Bootcamp

- Intensive and exciting Bootcamp covering the fundamentals of Web and Software development where I learnt to build my portfolio website and develop the projects.
